PRO WELDER'S GAUGE

The Only Welding Gauge You'll Need

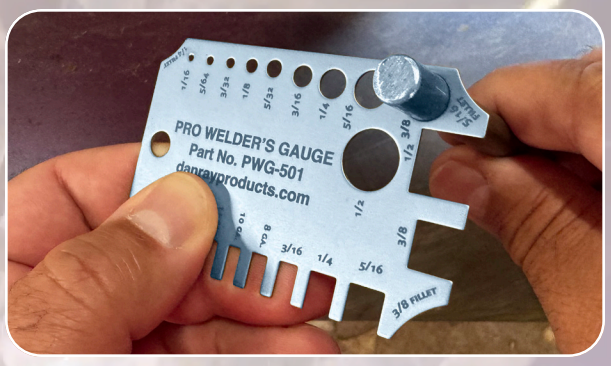

The Pro Welder's Gauge is a compact tool that replaces three separate gauges. It lets you quickly and accurately check:

- 10 rod, electrode, and round stock diameters (1/16" to 1/2")
- 11 material thicknesses (16 gauge to 1/2")
- 4 fillet weld sizes (3/16", 1/4", 5/16", and 3/8")

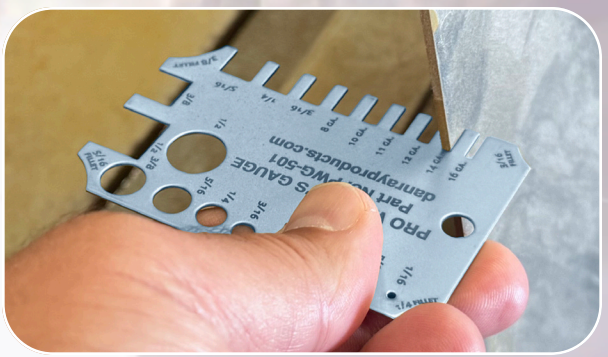

Made from durable 0.035"-thick stainless steel with laser-etched text and graphics that will not rub or scratch off. Credit-card sized with a 0.25" hole so it fits in a wallet or hangs from a lanyard. Ideal for welding students and professionals who want fast measurements without carrying multiple expensive tools.

Patented design (U.S. Pat. No. D893,321 S).

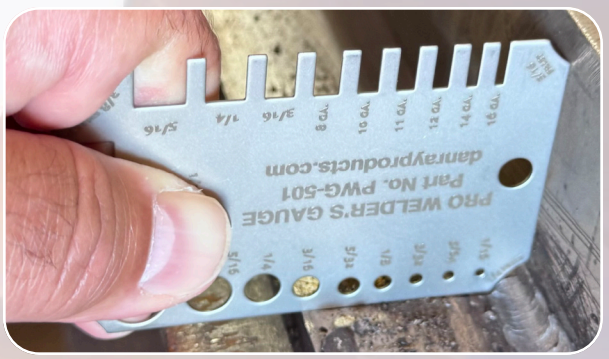

Pro Welder's Gauge
Part No. PWG-501

Checking round stock diameter.

Checking material thickness.

Checking a fillet weld size.
